

Synergy™

The whole-home video solution for your schedule

The Summit Broadband Synergy™ Media Platform brings a world of entertainment into your home and gives you the ability to watch the programs you want on your schedule.

Synergy's six-tuner Media Gateway allows you to record up to five shows at once while simultaneously watching another show live. With a Media Player installed, the Media Gateway also allows you to start watching a program in one room and finish watching it in any other room in your house. And with 1 TB of recording space, you can save hours of programming without fear of losing the programs you've already recorded.

You also will have access to Video on Demand, a wide-ranging library of movies, television shows, music videos and more, many at no additional cost.* Programs can be accessed from the On Demand button on your remote control; the availability of the programming varies based upon what channels you're subscribed to. If you don't have time to finish a program, it'll be waiting for you On Demand when you return.**

Synergy gives you more control over the programs you want to watch. With the ability to set parental controls, hide channels of your choosing, and protect recordings and settings with a PIN, you have all the options you need to ensure the entertainment available is appropriate for all the audiences in your home.

Can't decide what to watch? Synergy gives you the opportunity to search both live television programs, along with your own library of recordings. Search by title, genre, or cast member across the entire platform – and when you find what you like, you have the option to tune to it live or set a recording.
